

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS EkinsGuinness Dynamic Growth Fund (the "Fund"),

a fund within WS EkinsGuinness Funds (the "Company")
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

B Income (ISIN: GB00BD8YW758)

Objective and Investment Policy

Objective

The Fund aims to provide capital growth and income over the long-term (periods of 5 years or more).

Investment Policy

The Investment Adviser uses a global quantitative investment methodology to invest dynamically across a range of asset classes including equities, bonds (which may include fixed and floating interest rate sovereign and corporate bonds), commodities, cash and near cash. More information on this methodology is set out under "Fund Characteristics" in Appendix D of the Prospectus.

The allocations within the Fund to different asset classes and also the selection of sectors and regions within the equity allocation are actively managed. The investment strategy is flexible and dynamic to adapt to changing market conditions, enabling the Investment Adviser to select those asset classes that are deemed to be attractive according to the global quantitative investment methodology. At any particular time the portfolio may have between 0 and 100% exposure to any asset class.

The Fund's portfolio will typically be diversified across geographies (including Emerging Markets) and sectors. Under normal market conditions, exposure to the underlying asset classes will be indirect through Exchange Traded Funds (ETFs) and other eligible collective investment schemes (such as unit trusts and OEICs), which may employ active or passive strategies, investment companies and Exchange Traded Commodities (ETCs).

The Fund may also invest directly in equities or bonds, money market instruments, cash, near cash and deposits where the Investment Adviser considers such direct investment to be in the interests of investors. For

example, the Investment Adviser may consider direct investment provides a more efficient or cost-effective exposure to particular sectors or geographies than an indirect exposure.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell shares in the Fund on each business day.

The Fund aims to distribute available income every six months. The level of income is not guaranteed and may fluctuate.

The Investment Adviser may adopt an active currency overlay using derivatives including currency forwards with the intention of reducing currency risk and/or enhancing returns.

Derivatives may also be used for the purpose of meeting the Fund's investment objectives and for Efficient Portfolio Management (including hedging). The overall exposure to the Fund through the use of derivatives is intended to be limited.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at www.waystone.com.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.

- Currency Risk: As the Fund invests in overseas securities, movements in exchange rates, when not hedged, cause the value of your investments to increase or decrease. Currency hedging, where applied, may not fully eliminate this risk and mismatches can occur.
- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
- Emerging Markets Risk: The Fund may invest in emerging markets,

which are markets in developing countries. These markets may be more volatile than developed markets and may have less well-developed regulatory systems and disclosure standards. Emerging markets may have more political and economic risks that may result in large and frequent price movements. There is also a higher risk of liquidity issues or counterparty defaults, which could cause a loss to the Fund.

- Change in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall. The value of fixed interest securities may also be affected by trends in interest rates, inflation and credit ratings.
- Credit Risk: The value of a bond or other fixed interest security may be affected by its credit rating. A lower credit rating increases the risk that the issuer may not pay interest or repaying the loan. Fixed interest securities are also influenced by trends in interest rates and inflation, which can cause their value to fluctuate.
- Liquidity Risk: The Fund may invest in assets such as corporate bonds or shares in smaller companies, that could become difficult to buy or sell in adverse market conditions. This may delay or restrict the Fund's ability to meet redemption requests and could negatively affect the Fund's value.
- Derivative Risk: The Fund may use derivatives, which can be complex instruments. A derivative may not perform as expected and can create losses greater than its initial cost. A relatively small movement in value of the underlying investment may have a much larger impact, positive or negative, on the value of the Fund than if the Fund held the underlying investment directly.
- Concentration Risk: The Fund intentionally holds a relatively small number of investments and may also invest in securities within a particular industry, sector or geographical focus. This means that the performance of a single investment, industry, sector or region may have a greater impact on the Fund's value. The value of the Fund may therefore be subject to large swings (both up and down) compared to a more diversified portfolio.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.

Charges taken from the Fund over the year

Ongoing Charges	0.87%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	None
-----------------	------

The ongoing charges figure is based on expenses as at 30 November 2025. This figure may vary from year to year.

It excludes payments related to interest on borrowing and portfolio transaction costs, except in the case of transaction fees payable to the custodian and any entry/ exit charge paid when buying or selling shares/ units in another fund.

You may also be charged a dilution adjustment (an adjustment to cover dealing costs incurred by the Fund) on entry to or exit from the Fund.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Company's Prospectus, available at www.waystone.com.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 12 July 2017. This share class was launched on 12 July 2017.

Past performance is calculated in GBP.

The fund was renamed in 2025 and was previously known as WS Enigma Dynamic Growth Fund.
