

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Enigma Dynamic Growth Fund B Income

WS Enigma Dynamic Growth Fund, a sub-fund of the WS Enigma Funds B Income shares GBP, ISIN: GB00BD8YW758
The Authorised Corporate Director of this Fund is: Waystone Fund Services UK Limited.

Objectives and investment policy

The Fund aims to provide capital growth and income over the long-term (periods of 5 years or more).

The Investment Adviser uses a global quantitative investment methodology to invest dynamically across a range of asset classes including equities, bonds (which may include fixed and floating interest rate sovereign and corporate bonds), commodities, cash and near cash. More information on this methodology is set out under "Fund Characteristics" in Appendix D of the Prospectus.

The allocations within the Fund to different asset classes and also the selection of sectors and regions within the equity allocation are actively managed. The investment strategy is flexible and dynamic to adapt to changing market conditions, enabling the Investment Adviser to select those asset classes that are deemed to be attractive according to the global quantitative investment methodology. At any particular time the portfolio may have between 0 and 100% exposure to any asset class.

The Fund's portfolio will typically be diversified across geographies (including Emerging Markets) and sectors. Under normal market conditions, exposure to the underlying asset classes will be indirect through Exchange Traded Funds (ETFs) and other eligible collective investment schemes (such as unit trusts and OEICs), which may employ active or passive strategies, investment companies and Exchange Traded Commodities (ETCs).

The Fund may also invest directly in equities or bonds, money market instruments, cash, near cash and deposits where the Investment Adviser considers such direct investment to be in the interests of investors. For example, the Investment Adviser may consider direct investment provides a more efficient or cost-effective exposure to particular sectors or geographies than an indirect exposure.

The Investment Adviser may adopt an active currency overlay using derivatives including currency forwards with the intention of reducing currency risk and/or enhancing returns. Derivatives may also be used for the purpose of meeting the Fund's investment objectives and for Efficient Portfolio Management (including hedging). The overall exposure to the Fund through the use of derivatives is intended to be limited.

Investors can redeem shares on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

For income shares, any income received is paid out to you twice a year. For accumulation shares, any income received is reflected in the price of the shares.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is in the above risk category because it invests in a variety of asset classes.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- The Fund invests in global markets, with some regions being regarded as more risky. The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- The investment strategy followed by the Investment Adviser involves potentially investing in a range of different asset classes and adjusting the asset allocation according to analysis of valuation analytics and technical measurements including price momentum, price trends and overbought / oversold indicators, all using historical market data. The asset allocation is therefore likely to change dynamically and significantly over time depending on market conditions and could for example vary from 100% equity to 100% bonds and other fixed interest over time.
- Whilst the intention for using derivatives is to generate positive returns or to reduce risk, this outcome is not guaranteed and derivatives involve additional risk which could lead to significant losses.
- There is a risk that any company providing services such as safekeeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.85%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	No
-----------------	----

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the expenses incurred by the Fund (annualised) for the six months ended 31 May 2023.
- The figure may vary from year to year. It excludes payments related to interest on borrowing and portfolio transaction costs, except in the case of transaction fees payable to the custodian and any entry/ exit charge paid when buying or selling shares/ units in another fund.
- For details of the actual charges, please contact your financial adviser/distributor.

Past performance

Source: FE fundinfo 2023

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 12/07/2017.
- Share/unit class launch date: 12/07/2017.
- Performance is calculated in GBP.
- Performance is shown inclusive of all charges, except entry charges.
- Performance is shown on a total return basis (on the basis that distributable income has been reinvested).
